EDUCATION

University of Florida*

Master of Science in Computer Science

Gainesville, FL

Aug. 2024 – May 2026

Dayananda Sagar College of Engineering

Bachelor of Engineering in Telecommunication

Bangalore, India

Aug. 2016 – Aug 2020

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, Golang, C/C++, Java, NoSQL (MongoDB), SQL (Postgres), HTML/CSS

Frontend & Backend Frameworks: Node.js, Express.js, Django, Flask, Angular, React

Dev Ops: Git, Docker, Terraform, AWS, Jenkins, Linux/Unix, Nginx, Kubernetes

Testing/Other: Jmeter, Mocha, PyTest, Robot Framework, JUnit, Jest, Kafka, SQS, Lambda, System Design

EXPERIENCE

Software Development Engineer - 2

April 2022 – August 2024

Zetwerk Manufacturing Private Limited

- **Led a team** to develop a logistics app with **Google Maps** integration, tracking **20,000+ containers and trucks**
- Built a service to **analyze MongoDB logs** and **recommend indexes**, optimizing and reducing costs by **\$10,000/year**.
- Built a Mongoose plugin to **redistribute queries** in a MongoDB replica-set, reducing load on primary node **by 65%**.
- Developed an **ETL pipeline** using **MongoDB change streams** and **Kafka** to aggregate data from over 10 databases.
- Leveraged **AWS Lambda** and **SQS** for event processing, to pull data into **Postgres** for real-time analytics.
- Led the **recruitment process** for **DevOps & SDE** roles, **conducting interviews** for 30+ candidates

Software Development Engineer - 1

December 2020 – April 2022

Zetwerk Manufacturing Private Limited

- Engineered a **MEAN** app to **generate UI components** from database definitions, supporting 14+ inquiry forms, handling **\$2M in monthly inquiries**, & cutting development time by **70%**.
- **Automated** third-party integration with **web-scraping**, generating **\$3M+** in revenue and **saving 19,750 hours**
- **Dockerized 8+** microservices, streamlining the setup of the local development environment
- Built **Terraform** configurations to automate **infrastructure provisioning**, cutting infra setup time by **80%**

Full-Stack Development Intern

March 2020 – September 2020

Netgear Research India Pvt Ltd

- Developed BugSpy, a **Django** app with **MySQL & Redis** for **real-time monitoring** of access points and clients
- The web application improved tester **efficiency by 60%**, by automating testbed reporting with **graphs & dashboards**
- Developed automated regression testing using **Robot Framework** to fetch health statistics & generate crash reports

Software Engineering Intern

February 2020 – August 2020

Resolute AI

- Replaced server polling with **WebSockets** using **Django Channels**, improving user experience.
- Developed backend **REST APIs** for an AI application and set up async processing with **Celery** and **RabbitMQ**
- Deployed applications on **Docker containers** and managed deployments on AWS with **NGINX** as a reverse proxy
- Setup **CI pipeline** on **GitHub Actions** with **Unit Tests** and **SonarQube**, increasing code coverage from 15% to **78%**

PROJECTS

Syncable | Founder | MongoDB, Angular, Express, Node.js, Docker, AWS

September 2023 – Present

- Spearheaded the development of a **SaaS platform** for event and studio management with integrated **ticketing**
- Implemented **Attribute-Based Access Control (ABAC)**, ensuring data separation on a single deployment
- Processed **\$12,000+** in transactions, demonstrating platform reliability, while scaling to **200+ active users**
- Architected a **Dockerized CI/CD** pipeline with **AWS ECR**, enabling faster deployments on **AWS EC2**
- 3rd party API integrations: **SendGrid**, **Razorpay**, **NewRelic**, and **Logz.io** to enhance functionality and **observability**
